

User testing

Step 1: The Usability Test

User Feedback: Explain here in detail

1. This design is very close to Youtube, but it is too mess to see the main areas on the website.
2. On the first page, people don't think this will be a good "start page", we can use the model from Netflix.
3. There is no way for people to sign in thus, we should set a single page for people to sign in so that they can have more services.

Proposed Changes as a result of feedback

1. We should change this mess website into a concise one.
2. We can set one more page for people to just research
3. We should have a sign-in page.

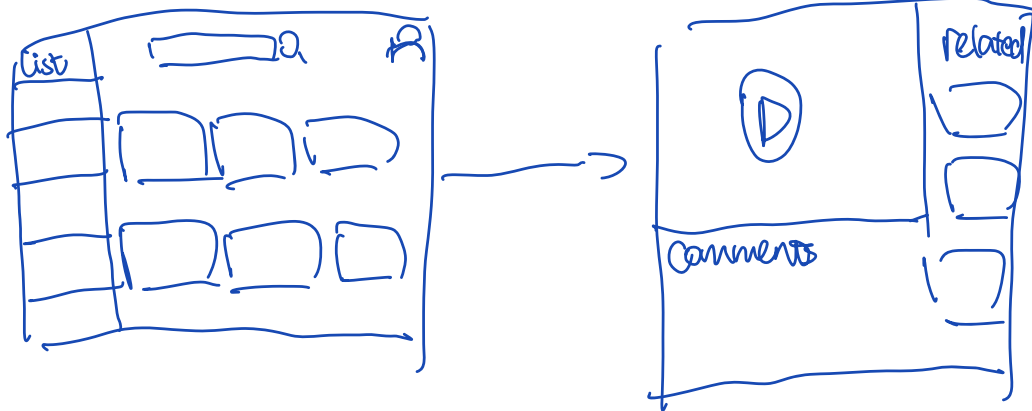

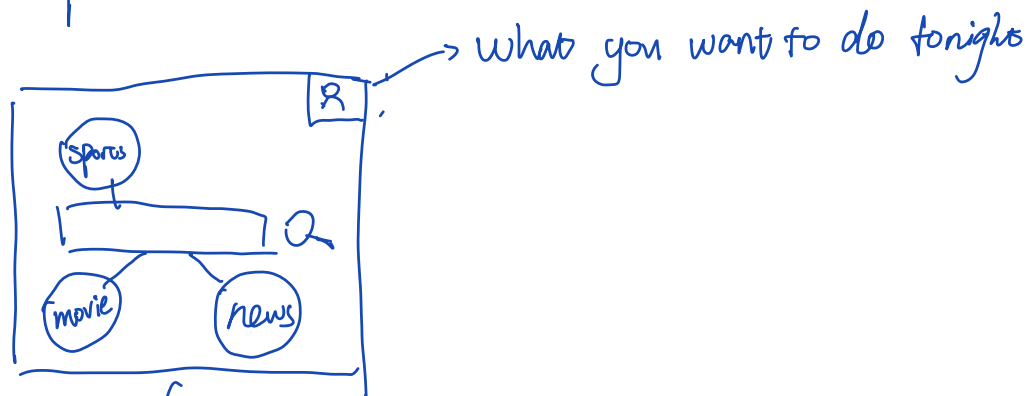

Step 2: Revision

Explanation of changes made

1. Add one more page for people to select what they want, like the filter function.
2. Make all the websites more concise.
3. in the play page, add a carton for people to sign in.

Sketch with changes

Step 2.

Step 3: Second Usability Test

User Feedback: Explain here in detail

1. If the rank list is placed on the left side, it will take up a lot of space and is not very beautiful
2. The login screen is not obvious and some people with accounts are not able to log in to get a better experience
3. There is no personalize services.

Proposed Changes as a result of feedback

1. We can put the rank list, the division of different videos on the bottom of the website.
2. We should add a single page for login.
3. We can also add one more page for people to select their own interests.

Step 4: Revision

Explanation of changes made

1. Add a single page like what we will do before we use the computer (start the system of computer)
2. Give audiences some selections for what they are interesting in before get into the first page of mytube.
3. Put different areas on the bottom of the website whether the left side so that the whole website will be concisely.
